ACCESSIBILITY AUDIT · EXECUTIVE SUMMARY

www.bluetread.com

Quick automated scan of one page against WCAG 2.2 Level AA, using axe-core and Lighthouse. No manual testing was done, so this is a starting point, not a conformance assessment. Results are organized by the four POUR principles:

Audit date
October 30, 2026

Target
WCAG 2.2 AA

Scope
1 page · https://www.bluetread.com/

Prepared by
BlueTread

P Perceivable
Everyone can take in the content by sight, sound, screen reader or zoom.

O Operable
Everyone can use every control and get around, with a mouse, keyboard or other device.

U Understandable
Text, forms and behavior are clear and predictable, and help people fix mistakes.

R Robust
The app works reliably with assistive technology such as screen readers.

ACCESSIBILITY SCORE

95 / 100

Not yet conformant

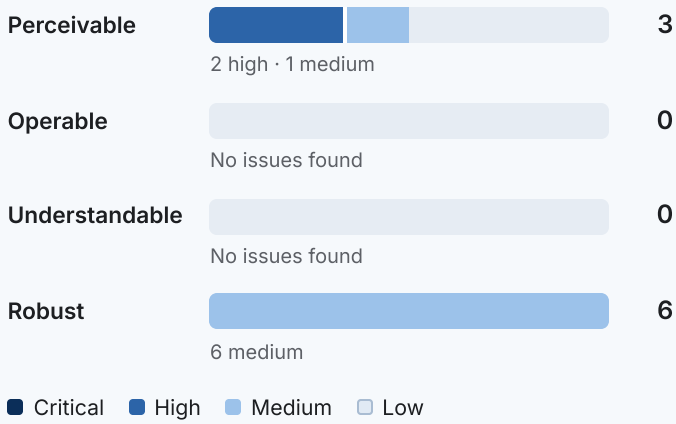

Not a pass mark: it counts remaining issues, weighted by severity. Level AA is all or nothing: every applicable criterion must pass. **0 of 55** pass today.

9	0	2	7	0
Total issues	Critical	High	Medium	Low

KEY TAKEAWAY

2 high-severity issues create barriers on this page. Fix first: Elements must meet minimum color contrast ratio thresholds.

Issues by principle

Top priorities

High — Elements must meet minimum color contrast ratio thresholds
WCAG 1.4.3 · /

High — Background and foreground colors do not have a sufficient contrast ratio.
WCAG 1.4.3 · div.uui-container-large-7 > div.uui-padding-vertical-xhuge-6 > div.uui-max-width-large-2 > div.uui-heading-subheading-3

Medium — Heading levels should only increase by one
WCAG · /

Medium — Document should not have more than one banner landmark
WCAG · /

Medium — Document should have one main landmark
WCAG · /

Results by principle

P Perceivable

Needs remediation

Can every user see or hear the content?

Most serious: Elements must meet minimum color contrast ratio thresholds; Background and foreground colors do not have a sufficient contrast ratio.. 3 issues found.

High	Elements must meet minimum color contrast ratio thresholds	1.4.3
High	Background and foreground colors do not have a sufficient contrast ratio.	1.4.3
Medium	Heading elements are not in a sequentially-descending order	1.3.1

O Operable

Pass

Can every user navigate and interact?

No issues found.

- ✓ Every control reachable and usable by keyboard
- ✓ Clear, visible focus indicator throughout
- ✓ No keyboard traps in menus, modals or date pickers
- ✓ Skip link, logical focus order and descriptive page titles

U Understandable

Pass

Is the content and behavior clear?

No issues found.

- ✓ Every field has a visible label
- ✓ Errors explain what went wrong and how to fix it
- ✓ Page language declared
- ✓ Consistent labels and navigation

R Robust

Needs remediation

Does it work with assistive technology?

Most serious: Heading levels should only increase by one; Document should not have more than one banner landmark. 6 issues found.

Medium	Heading levels should only increase by one
Medium	Document should not have more than one banner landmark
Medium	Document should have one main landmark
Medium	Landmarks should have a unique role or role/label/title (i.e. accessible name) combination

+ 2 more issue types in the detailed findings

WCAG 2.2 Level AA reference

Every success criterion required for Level AA, in plain language, with what this audit found. **Pass**: tested on every platform with no failures. **N/A**: the app has none of that content (for example, no audio or video). **Web only**: applies to websites, not native apps. **Not yet verified**: testing isn't finished. A pass reflects this audit's testing; it isn't a guarantee of conformance.

P Perceivable

CRITERION	LEVEL	WHAT IT MEANS	THIS AUDIT
1.1.1 Non-text Content	A	Images, icons and other non-text content have a text alternative.	Not yet verified Scanners found no issues; needs a manual check
1.2.1 Audio-only and Video-only (Prerecorded)	A	Recorded audio has a transcript; silent video has a text or audio description.	Not yet verified
1.2.2 Captions (Prerecorded)	A	Recorded video with sound has captions.	Not yet verified Scanners found no issues; needs a manual check
1.2.3 Audio Description or Media Alternative (Prerecorded)	A	Recorded video has an audio description or a full text alternative.	Not yet verified
1.2.4 Captions (Live)	AA	Live video with sound has captions.	Not yet verified
1.2.5 Audio Description (Prerecorded)	AA	Recorded video describes important visual details in audio.	Not yet verified
1.3.1 Info and Relationships	A	Headings, lists, tables, labels and groups are marked up so assistive technology understands the structure.	Medium 1 finding
1.3.2 Meaningful Sequence	A	Content is read in a logical order.	Not yet verified
1.3.3 Sensory Characteristics	A	Instructions don't rely only on shape, size, position or sound.	Not yet verified
1.3.4 Orientation	AA	Content works in both portrait and landscape.	Not yet verified Scanners found no issues; needs a manual check
1.3.5 Identify Input Purpose	AA	Common fields (name, email, address) are marked so browsers can autofill them.	Not yet verified Scanners found no issues; needs a manual check
1.4.1 Use of Color	A	Color is never the only way information is shown.	Not yet verified Scanners found no issues; needs a manual check
1.4.2 Audio Control	A	Audio that plays automatically can be paused or muted.	Not yet verified Scanners found no issues; needs a manual check
1.4.3 Contrast (Minimum)	AA	Text has enough contrast with its background (4.5:1, or 3:1 for large text).	High 2 findings

CRITERION	LEVEL	WHAT IT MEANS	THIS AUDIT
1.4.4 Resize Text	AA	Text can be zoomed to 200% without losing content or function.	Not yet verified Scanners found no issues; needs a manual check
1.4.5 Images of Text	AA	Real text is used instead of pictures of text.	Not yet verified
1.4.10 Reflow	AA	Content fits a 320px-wide screen without scrolling in two directions.	Not yet verified
1.4.11 Non-text Contrast	AA	Controls, focus indicators and meaningful graphics have 3:1 contrast.	Not yet verified
1.4.12 Text Spacing	AA	Nothing breaks when users increase line, letter or word spacing.	Not yet verified Scanners found no issues; needs a manual check
1.4.13 Content on Hover or Focus	AA	Tooltips and pop-ups can be dismissed, hovered over and don't vanish unexpectedly.	Not yet verified

O Operable

CRITERION	LEVEL	WHAT IT MEANS	THIS AUDIT
2.1.1 Keyboard	A	Everything can be done with a keyboard alone.	Not yet verified Scanners found no issues; needs a manual check
2.1.2 No Keyboard Trap	A	Keyboard focus never gets stuck in one place.	Not yet verified
2.1.4 Character Key Shortcuts	A	Single-key shortcuts can be turned off or remapped.	Not yet verified
2.2.1 Timing Adjustable	A	Users can turn off, adjust or extend time limits.	Not yet verified Scanners found no issues; needs a manual check
2.2.2 Pause, Stop, Hide	A	Moving, blinking or auto-updating content can be paused or hidden.	Not yet verified Scanners found no issues; needs a manual check
2.3.1 Three Flashes or Below Threshold	A	Nothing flashes more than three times a second.	Not yet verified
2.4.1 Bypass Blocks	A	Users can skip repeated content such as navigation.	Not yet verified Scanners found no issues; needs a manual check
2.4.2 Page Titled	A	Every page has a descriptive title.	Not yet verified Scanners found no issues; needs a manual check
2.4.3 Focus Order	A	Keyboard focus moves in a logical order.	Not yet verified Scanners found no issues; needs a manual check

CRITERION	LEVEL	WHAT IT MEANS	THIS AUDIT
2.4.4 Link Purpose (In Context)	A	Each link's purpose is clear from its text or context.	Not yet verified Scanners found no issues; needs a manual check
2.4.5 Multiple Ways	AA	There is more than one way to find a page, such as navigation and search.	Not yet verified
2.4.6 Headings and Labels	AA	Headings and labels describe their topic or purpose.	Not yet verified
2.4.7 Focus Visible	AA	Users can always see which element has keyboard focus.	Not yet verified
2.4.11 Focus Not Obscured (Minimum)	AA	Focused elements aren't hidden behind sticky headers or overlays.	Not yet verified
2.5.1 Pointer Gestures	A	Multi-finger or path gestures have a simple single-tap alternative.	Not yet verified
2.5.2 Pointer Cancellation	A	Actions happen on release, so accidental taps can be cancelled.	Not yet verified
2.5.3 Label in Name	A	A control's accessible name includes its visible label.	Not yet verified Scanners found no issues; needs a manual check
2.5.4 Motion Actuation	A	Features triggered by shaking or tilting have an alternative and can be turned off.	Not yet verified
2.5.7 Dragging Movements	AA	Anything done by dragging can also be done with single clicks.	Not yet verified
2.5.8 Target Size (Minimum)	AA	Click and tap targets are at least 24×24 px or well spaced.	Not yet verified Scanners found no issues; needs a manual check

U Understandable

CRITERION	LEVEL	WHAT IT MEANS	THIS AUDIT
3.1.1 Language of Page	A	The page declares its language.	Not yet verified Scanners found no issues; needs a manual check
3.1.2 Language of Parts	AA	Passages in a different language are marked.	Not yet verified Scanners found no issues; needs a manual check
3.2.1 On Focus	A	Moving focus to an element doesn't trigger unexpected changes.	Not yet verified
3.2.2 On Input	A	Changing a setting doesn't cause unexpected changes without warning.	Not yet verified
3.2.3 Consistent Navigation	AA	Navigation appears in the same order on every page.	Not yet verified
3.2.4 Consistent Identification	AA	Things that do the same job are labelled the same way.	Not yet verified

CRITERION	LEVEL	WHAT IT MEANS	THIS AUDIT
3.2.6 Consistent Help	A	Help options appear in the same place on every page.	Not yet verified
3.3.1 Error Identification	A	Errors are clearly identified and described in text.	Not yet verified
3.3.2 Labels or Instructions	A	Fields have labels or instructions.	Not yet verified Scanners found no issues; needs a manual check
3.3.3 Error Suggestion	AA	Error messages suggest how to fix the problem.	Not yet verified
3.3.4 Error Prevention (Legal, Financial, Data)	AA	Important submissions can be reviewed, corrected or undone.	Not yet verified
3.3.7 Redundant Entry	A	Users aren't asked to re-enter information they already provided.	Not yet verified
3.3.8 Accessible Authentication (Minimum)	AA	Logging in doesn't require solving puzzles or memorizing; paste and password managers work.	Not yet verified

R Robust

CRITERION	LEVEL	WHAT IT MEANS	THIS AUDIT
4.1.2 Name, Role, Value	A	Every control exposes its name, role and state to assistive technology.	Medium 1 finding
4.1.3 Status Messages	AA	Status updates are announced without moving focus.	Not yet verified

Recommended remediation path

PHASE 1

Fix high-impact barriers

- Elements must meet minimum color contrast ratio thresholds
- Background and foreground colors do not have a sufficient contrast ratio.

PHASE 2

Polish and harden

- Heading levels should only increase by one
- Document should not have more than one banner landmark
- Document should have one main landmark
- Landmarks should have a unique role or role/label/title (i.e. accessible name) combination
- All page content should be contained by landmarks
- Heading elements are not in a sequentially-descending order
- Document does not have a main landmark.

Detailed results

How the 95% score is calculated

SEVERITY	FINDINGS	WEIGHT	DEDUCTION
Critical	0	10	−0
High	2	5	−10
Medium	7	2	−14
Low	0	0.5	−0
Raw total	**9**	—	**−24**

This score starts at 100. The raw deduction is normalized against the number of elements evaluated, so small pages aren't over-penalized.

How severity is decided

WCAG has no severity scale; it only says pass or fail. A criterion fails if it has any finding, whatever the severity. Severity sets the order to fix things in and how much each finding lowers the score.

SEVERITY	MEANS
Critical	Blocks the task: someone can't finish it at all (e.g. font scaling turned off app-wide).
High	A major barrier that's hard to work around (e.g. a button with no name, a field with no label).
Medium	A real problem with a workaround, or one that affects fewer people (e.g. a button that doesn't announce its role).
Low	Minor friction (e.g. heading-styled text not marked as a heading).

FINDING FROM	HOW ITS SEVERITY IS SET
axe (web)	axe's own impact rating: critical → Critical, serious → High, moderate → Medium, minor → Low.
Lighthouse (web)	A fixed severity for each Lighthouse audit, set by the toolkit.
Manual testing	The severity the tester chose. An issue written without one is Low. A check marked failed with no description at all uses that check's default severity.

Results by WCAG level

> WCAG conformance is all or nothing: to meet Level AA, every applicable Level A and AA criterion must pass. There is no partial pass. Criteria that don't apply (N/A or web only) count as met. So far 0 of 55 applicable criteria pass; 3 fail and 52 aren't verified yet.

LEVEL	PASS	FAIL	N/A	WEB ONLY	NOT YET VERIFIED	CRITERIA
Level A	0	2	0	0	29	31
Level AA	0	1	0	0	23	24

N/A: the app has none of the content the criterion covers (for example, no audio or video). **Web only**: the criterion applies to websites, not native apps (for example, Bypass Blocks). Neither counts for or against the score, and both count as met for conformance. **Not yet verified**: testing isn't finished for this criterion on every platform.

Failing WCAG success criteria

CRITERION	LEVEL	WORST SEVERITY	FINDINGS	FAILS ON
1.4.3 Contrast (Minimum)	AA	High	2	/ `div.uui-container-large-7 > div.uui-padding-vertical-xhuge-6 > div.uui-max-width-large-2 > div.uui-heading-subheading-3`
1.3.1 Info and Relationships	A	Medium	1	`div.uui-padding-vertical-xhuge > div.w-layout-grid > div.uui-layout34_content > h3.uui-heading-xsmall`
4.1.2 Name, Role, Value	A	Medium	1	`html.w-mod-js`

Scorecard by category

CATEGORY	SCORE	PRIORITY	FINDINGS
Semantics	40%	Medium	4
Contrast	70%	High	2
Typography	70%	Medium	2
Navigation	85%	Medium	1

Findings

Issues reported on several pages by the same rule are merged into one entry.

Perceivable · 3 findings

High **Elements must meet minimum color contrast ratio thresholds**

WCAG	1.4.3 Contrast (Minimum) (AA)
PAGE	/
ELEMENT	`.uui-max-width-large-2 > .uui-heading-subheading-3`
ISSUE	Ensure the contrast between foreground and background colors meets WCAG 2 AA minimum contrast ratio thresholds
FIX	See rule documentation.
SOURCE	axe · `axe:color-contrast`

High **Background and foreground colors do not have a sufficient contrast ratio.**

WCAG	1.4.3 Contrast (Minimum) (AA)
PAGE	div.uui-container-large-7 > div.uui-padding-vertical-xhuge-6 > div.uui-max-width-large-2 > div.uui-heading-subheading-3
ISSUE	Low-contrast text is difficult or impossible for many users to read. [Learn how to provide sufficient color contrast](https://dequeuniversity.com/rules/axe/4.12/color-contrast).
SOURCE	lighthouse · lighthouse:color-contrast

Medium **Heading elements are not in a sequentially-descending order**

WCAG	1.3.1 Info and Relationships (A)
PAGE	div.uui-padding-vertical-xhuge > div.w-layout-grid > div.uui-layout34_content > h3.uui-heading-xsmall
ISSUE	Properly ordered headings that do not skip levels convey the semantic structure of the page, making it easier to navigate and understand when using assistive technologies. [Learn more about heading order](https://dequeuniversity.com/rules/axe/4.12/heading-order).
SOURCE	lighthouse · lighthouse:heading-order

Robust · 6 findings

Medium **Heading levels should only increase by one**

WCAG	—
PAGE	/
ELEMENT	.uui-layout34_content:nth-child(1) > .uui-heading-xsmall
ISSUE	Ensure the order of headings is semantically correct
FIX	See rule documentation.
SOURCE	axe · axe:heading-order

Medium **Document should not have more than one banner landmark**

WCAG	—
PAGE	/
ELEMENT	.rl_navbar2_component
ISSUE	Ensure the document has at most one banner landmark
FIX	See rule documentation.
SOURCE	axe · axe:landmark-no-duplicate-banner

Medium **Document should have one main landmark**

WCAG	—
PAGE	/
ELEMENT	html
ISSUE	Ensure the document has a main landmark
FIX	See rule documentation.
SOURCE	axe · axe:landmark-one-main

Medium

Landmarks should have a unique role or role/label/title (i.e. accessible name) combination

WCAG	—
PAGE	/
ELEMENT	`.rl_navbar2_component`
ISSUE	Ensure landmarks are unique
FIX	See rule documentation.
SOURCE	axe · `axe:landmark-unique`

Medium

All page content should be contained by landmarks

WCAG	—
PAGE	/
ELEMENT	`.uui-section_header10`
ISSUE	Ensure all page content is contained by landmarks
FIX	See rule documentation.
SOURCE	axe · `axe:region`

Medium

Document does not have a main landmark.

WCAG	`4.1.2` Name, Role, Value (A)
PAGE	html.w-mod-js
ISSUE	One main landmark helps screen reader users navigate a web page. [Learn more about landmarks] (https://dequeuniversity.com/rules/axe/4.12/landmark-one-main).
SOURCE	lighthouse · `lighthouse:landmark-one-main`

Automated checks only (axe-core, Lighthouse) on https://www.bluetread.com/. Automated scanners cover roughly 30–40% of WCAG success criteria; keyboard, screen reader, zoom, and content review weren't part of this quick scan. A full audit is needed to confirm conformance. Report generated 2026-10-30T19:23:43.037Z.
