BLUETREAD ACCESSIBILITY TOOLKIT · REFERENCE

Which tool checks which WCAG criterion

Every WCAG 2.2 Level A and AA success criterion, and which part of the toolkit checks it: the automated scanners, the device measurement, or the manual checklist.

Generated **2026-10-30**

Toolkit version **0.3.0**

Standard **WCAG 2.2 A + AA**

Criteria **55**

23 / 55 have an automated check on websites

11 / 55 have an automated check on mobile apps

31 / 55 are manual-only (no tool checks them)

55 / 55 are in the manual checklist

HOW TO READ THIS

A ✓ means the tool has rules for that criterion. It doesn't mean the tool fully tests it: a scanner can find some failures of a criterion but can never confirm it passes. That's why every criterion still needs the manual checklist, and why a scan alone never marks a criterion as passing.

By criterion

axe and **Lighthouse** scan live web pages. **Code scan** reads React Native source for iOS and Android. **Device** measures touch targets on an Android phone. **Manual checklist** shows which products have a hands-on check for the criterion. Shaded rows have no automated check at all.

1. Perceivable

CRITERION	LEVEL	AXE Web	LIGHT-HOUSE Web	CODE SCAN iOS + Android	DEVICE Android	MANUAL CHECKLIST
1.1.1 Non-text Content	A	✓	✓	✓	–	Web + mobile
1.2.1 Audio-only and Video-only (Prerecorded)	A	–	–	–	–	Web + mobile
1.2.2 Captions (Prerecorded)	A	✓	✓	–	–	Web + mobile
1.2.3 Audio Description or Media Alternative (Prerecorded)	A	–	–	–	–	Web + mobile
1.2.4 Captions (Live)	AA	–	–	–	–	Web + mobile
1.2.5 Audio Description (Prerecorded)	AA	–	–	–	–	Web + mobile
1.3.1 Info and Relationships	A	✓	✓	✓	–	Web + mobile
1.3.2 Meaningful Sequence	A	–	–	–	–	Web + mobile
1.3.3 Sensory Characteristics	A	–	–	–	–	Web + mobile
1.3.4 Orientation	AA	✓	–	✓	–	Web + mobile

By tool

axe-core · Web

Loads each page in a browser (Playwright) and runs Deque's axe-core rules on the rendered page.

Run: `npx bt-a11y (website), npx bt-a11y quick <url>, npx bt-a11y axe <url>`

22 A/AA criteria: 1.1.1, 1.2.2, 1.3.1, 1.3.4, 1.3.5, 1.4.1, 1.4.2, 1.4.3, 1.4.4, 1.4.12, 2.1.1, 2.2.1, 2.2.2, 2.4.1, 2.4.2, 2.4.4, 2.5.3, 2.5.8, 3.1.1, 3.1.2, 3.3.2, 4.1.2

Lighthouse · Web

Google's Lighthouse accessibility audits, a subset of axe-core's rules run in Chrome.

Run: `npx bt-a11y (website), npx bt-a11y quick <url>, npx bt-a11y lighthouse <url>`

14 A/AA criteria: 1.1.1, 1.2.2, 1.3.1, 1.4.3, 1.4.4, 2.1.1, 2.4.1, 2.4.2, 2.4.3, 2.5.8, 3.1.1, 3.1.2, 3.3.2, 4.1.2

React Native code scan · iOS + Android

Reads the app's source code, app.json, Info.plist and AndroidManifest.xml for patterns that break accessibility.

Run: `npx bt-a11y (mobile app), npx bt-a11y code`

11 A/AA criteria: 1.1.1, 1.3.1, 1.3.4, 1.3.5, 1.4.3, 1.4.4, 2.5.3, 2.5.8, 3.3.2, 3.3.8, 4.1.2
AAA (when the audit targets AAA): 1.4.6, 2.3.3, 2.5.5

Device measurement · Android

Measures the real size of every tappable control on a connected Android phone or emulator.

Run: `npx bt-a11y target-size`

1 A/AA criteria: 2.5.8

React Native code scan rules

RULE	WHAT IT FLAGS	CRITERIA
rn-control-name	Touchable has no accessible name	1.1.1, 4.1.2
rn-control-role	Touchable has no accessibility role	4.1.2
rn-control-state	Stateful control doesn't expose its state	4.1.2
rn-label-in-name	Accessible name doesn't include the visible text	2.5.3
rn-hidden-control	Interactive control hidden from screen readers	4.1.2
rn-image-alt	Image has no text alternative or decorative marking	1.1.1
rn-input-label	Text input has no accessible label	1.3.1, 3.3.2, 4.1.2
rn-input-purpose	Personal-data field doesn't identify its purpose	1.3.5
rn-paste-blocked	Password field blocks paste and password managers	3.3.8
rn-font-scaling	Font scaling disabled	1.4.4
rn-font-scaling-cap	Font scaling capped below 200%	1.4.4
rn-font-scaling-global	Font scaling disabled app-wide	1.4.4
rn-target-size	Touch target smaller than the minimum size	2.5.8
rn-contrast	Text color contrast below the required ratio	1.4.3
rn-heading-role	Heading-styled text isn't marked as a heading	1.3.1
rn-orientation-lock	Screen orientation is locked	1.3.4
rn-reduce-motion	Animations don't respect Reduce Motion	2.3.3

Lighthouse audits the toolkit maps to WCAG

AUDIT	CRITERIA	AUDIT	CRITERIA
color-contrast	1.4.3	heading-order	1.3.1

aria-hidden-body	4.1.2	video-caption	1.2.2
aria-hidden-focus	4.1.2	frame-title	4.1.2

Level AAA

Only checked when the audit's target level is AAA. 3 of 31 AAA criteria have an automated check: 1.4.6, 2.3.3, 2.5.5. The rest are manual only.

Generated from the toolkit's own mappings (src/tool-coverage.ts) on 2026-10-30. Re-run `npm run docs:tool-coverage` after changing scanner rules or checklist items. 4.1.1 Parsing is obsolete in WCAG 2.2 and isn't listed.
